FREQUENTLY ASKED QUESTIONS

Do you think you can help me with my health problem?

Our clinic uses an innovative approach to assessing and treating your health care concerns. Perhaps you have experienced being examined by your doctor, having blood tests done, x-rays or other diagnostic tests taken, only for your doctor to report back that all your tests are normal yet both you and your doctor know that you are anything but normal!. Unfortunately this experience is all too common.

Most physicians are trained to look only in specific places for the answers, using the same familiar labs or diagnostic tests. Yet, many causes of illness cannot be found in these places. The usual tests do not look for food allergies, hidden infections, environmental toxins, mold exposures, nutritional deficiencies and metabolic imbalances. New gene testing can uncover underlying genetic predispositions that can be modified through diet, lifestyle, supplements or medications.

We use a variety of innovative testing techniques and procedures to help our patients prevent illness and recover from many chronic and difficult to treat conditions. Our clinicians are highly skilled in evaluating, assessing and treating chronic problems such as fibromyalgia, fatigue syndromes, autoimmune diseases, inflammatory disorders, mood and behavior disorders, memory problems and other chronic, complex conditions. We also focus on the prevention and treatment of heart disease, diabetes, dementia, hormonal imbalances and digestive disorders.

Can all the tests I need be done at this clinic?

Most of the testing can be performed at in the comfort of your own home but some will need to be done at the clinic or at a lab near you. Some testing can be done through conventional laboratories and others are only available through specialty laboratories. During your consultation, we will determine which tests are needed and then our office assistants can review the testing recommendations, the instructions (e.g. fasting or non-fasting, etc.) and costs. Some testing can be performed at home with test kits to collect urine, saliva or stool. Others may require you to go to a local laboratory to draw the blood. In all cases, we will assist you in coordinating initial and follow-up testing.

Occasionally, we may recommend certain tests that are not performed at our facility. In those instances, we can provide you with an order that you can take to a facility near your home or we can schedule an appointment to have them done near our office.

Do you take insurance?

No we do not. However some insurance carriers may partially cover medical services and laboratory tests performed by the physicians. Payments are expected for non-covered services by check, cash or credit card is due at the time services are provided. We will always inform you of your responsibility prior to any services being performed.

What credit cards do you accept?

We accept all credit cards through PayPal. If you like we can maintain an active credit card on file at the office so we can bill follow-up consultations, laboratory testing, and other services.

NEW PATIENT CASE HISTORY

Name _____, Date _____
Address _____
City _____, State _____, Zip _____
Home Phone _____, Work _____, Cell _____
E-Mail _____, Best way to contact you? _____

ESTABLISHING HEALTH GOALS

Personal Message

Before we begin our journey together, I would like to discuss something very important that will have a major impact on your ability to recover and achieve maximum improvement. After many years in private practice, I have had the opportunity to work with thousands of patients and have seen many patients achieve significant improvement while others have become frustrated and failed in their attempt to get well. After careful review, I have discovered the reasons why some people succeed and why others fail. This questionnaire is about much more than eliminating your symptoms – it's about living a life of vibrant health.

What do you hope to achieve in your visit with us?

If you had a magic wand and could erase three problems, what would they be?

1. _____

2. _____

3. _____

Have you made the decision to change? To do what it takes to get well?

Yes _____ No _____

I have read something interesting: *“The definition of insanity is to keep doing the same thing and expecting different results”*. If you keep following the same course of treatment you have been following will your results really change? Have you ever wondered if you are on the right path to achieving optimal health? Sometimes it requires taking a new and improved road to reach your destination.

Most people I ask tell me they're made the decision to change. But how many people have truly decided to change? Very few! Why? Because there is a big difference between deciding something and having “reasons” to actually do it.

When you have made a decision to make a change and you know your reasons, you create an internal power that can propel you to achieving health and wellness. So now I ask:

List up to 5 things that you have been unable to do as a result of your present symptoms. Please be specific. (Use extra pages if necessary)

List up to 5 things that you plan to do once you are feeling better. Please be specific. (Use extra pages if necessary)

Are there any other health goals you would like to achieve?

IMPORTANT PATIENT INFORMATION

In order to best serve you, the *Patient Acceptance Policy* should be carefully reviewed. It is Live Right's opinion that you should be well informed on our expectations and clinical procedures. To prevent any misunderstandings or confusion on what to expect, we would appreciate that you read the below steps and provide your signature. This would simply imply that you have read the *Patient Acceptance Policy* and understand what is expected of you.

1. Completion of the following forms:

- The Health Questionnaires**
- The Nutritional Assessment Questionnaire** This questionnaire was developed to gather important information about your body. It will help our health care practitioners assist in helping you. The medical questionnaire will allow us to quickly “zero” in on the probable causes of your health problems.
- The Diet Diary**

2. Medical Records from all physicians will be requested if necessary.

3. Once our health care providers have your completed questionnaires and copies of any medical records, a follow up appointment will be scheduled to review your case.

4. Based on your scheduled appointment and review of all your medical information, it may be necessary to obtain **lab testing that would be determined by your health care provider.**

5. If you have not had a physical examination within the last two years or since the start of your most recent health problem, it is recommended to schedule an appointment with your primary physician.

6. The results of your lab tests may take approximately one to two **weeks. We will review them once we get them.** This appointment usually takes approximately one to one and half hours. You will be presented with a copy of your labs. It is recommended that you have your spouse or a supportive family member attend this appointment.

7. Your treatment may consist of dietary and lifestyle changes as well as prescribed **Natural Pharmaceuticals**, which must be paid at the time of purchase.

8. It is strongly recommended that you have access to a computer with Internet Connection. **A progress medical questionnaire** will be posted to your e-mail one week before your next scheduled appointment. Completion of the progress questionnaire is required every 4 weeks to monitor your progress.

9. Follow-up consultations will be scheduled every **3, 6 or 12 weeks** allowing you the opportunity to discuss your progress and any concerns with our health care providers. At this time determine what direction to help you continue your progress. Your cooperation in taking “**personal responsibility**” in your health care will go a long way in getting better.

10. Abnormal laboratory tests will need to be re-evaluated. The success of your treatment will not only be measured on the reduction of elimination of your physical symptoms, but on abnormal laboratory tests returning to a normal status.

I, _____ have read and fully understand the **Patient Acceptance Policy**

AUTHORIZATION FOR RELEASE OF MEDICAL RECORDS

Requesting Records of Doctor:

Name of Facility or Person: _____

Address: _____

Telephone number () ____ - _____ Fax number () ____ - _____

THE PURPOSE FOR THIS RELEASE

You are hereby authorized to furnish and release to **Dr. Steven Ross** all information from my medical, psychological, and other health records, with no limitation placed on history of illness or diagnostic or therapeutic information, including the furnishing of photocopies of all written documents pertinent thereto.

In addition to the above general authorization to release my protected health information. I further authorize release of the following information if it is contained in those records:

Alcohol or Drug Abuse: Yes No

Communicable disease related information, including AIDS or ARC diagnosis and/or HIT or HTLA-III test results or treatment: Yes No

Genetic Testing Yes No

Note: With respect to drug and alcohol abuse treatment information, or records regarding communicable disease information, the information is from confidential records which are protected by State and Federal laws that prohibit disclosure with the specific written consent of the person to who they pertain, or as otherwise permitted by law. A general authorization for the release of the protected health information is not sufficient for this purpose.

This authorization can be revoked in writing at any time except to the extent that disclosure made in good faith has already occurred in reliance on this authorization.

I hereby release **Live Right Wellness Centers®**, its employees, agents managing members, and the attending physician(s) from legal responsibility or liability for the release of the above information to the extent authorized. A copy of this authorization shall be as valid as the original.

I understand there may be a fee for this service depending on the number of pages photocopied. However; no such fee will be charged if these records are requested for continuing medical care.
